History

#1 - 01/04/2019 08:24 AM - David Adams

Test build is underway.

#2 - 01/04/2019 10:25 AM - David Adams

Tag made and build underway.

#3 - 01/04/2019 12:02 PM - David Adams

The slf7 gcc builds failed. The slf6 builds succeeded and have been installed.

#4 - 01/04/2019 12:05 PM - David Adams

This is the slf7 error:

```
[ 79%] Linking CXX shared library ../../lib/libdune_RegCVN_macro_RegCVNAna_module.so
//usr/lib64/libharfbuzz.so.0: undefined reference to `FT_Get_Var_Blend_Coordinates'
collect2: error: ld returned 1 exit status
make[2]: *** [dunetpc/bin/cvnCreateDB] Error 1
make[1]: *** [dunetpc/dune/CVN/levelDB/CMakeFiles/cvnCreateDB.dir/all] Error 2
make[1]: *** Waiting for unfinished jobs....
```

#5 - 01/05/2019 05:14 AM - David Adams

The c2 builds were all successful and have been installed.

There were some messages when installing the mac builds:

```
Installing /nashome/d/dladams/reltars/c2/dunetpc-08.02.00-d16-x86_64-c2-debug.tar.bz2
tar: Ignoring unknown extended header keyword `LIBARCHIVE.creationtime'
tar: Ignoring unknown extended header keyword `SCHILY.dev'
tar: Ignoring unknown extended header keyword `SCHILY.ino'
tar: Ignoring unknown extended header keyword `SCHILY.nlink'
```

#6 - 01/05/2019 05:19 AM - David Adams

- Status changed from New to Feedback

Release v08_02_00 is now complete (without slf7 gcc builds). I am leaving this ticket open until we resolve the slf7 gcc issue.

Once that is done, please let me know if we want another release, presumably v08_02_00_01.

#7 - 01/07/2019 07:08 AM - Christoph Alt

Adding Saul and Leigh as this is their code.

#8 - 01/07/2019 07:13 AM - Leigh Whitehead

This is from the regression CVN for electron neutrino energy measurement, and isn't code from Saul or me. The responsible people are: Ilsoo Seong, Lars Hertel and Jianming Bian according to their most recent presentation.

#9 - 01/07/2019 07:20 AM - Christoph Alt

Sorry!

@Ilsoo, Lars and Jianming: please see error in reply 4.

#10 - 01/08/2019 11:12 AM - Ilsoo Seong

I can't reproduce this issue. I can build v08_02_00 with the prof and debug version (e17) on my slf7 desktop. So, I can not find exactly which part has an issue.

#11 - 01/12/2019 10:06 AM - David Adams

- *Status changed from Feedback to Closed*

This problem was not resolved and is repeated in the following week's build: [#21623](#).

I close this report as the problem is being addressed there.
